# Kerio**Operator**

An Enterprise-Class Phone System Without the High Price Tag

Kerio Operator is a standards-based VoIP system that replaces the traditional and often complex PBX. Designed for small and mid-sized businesses, it reduces operating costs and simplifies administration while offering your users powerful enterprise-class capabilities.

- ✓ **Easy** fast administration from the desktop or a tablet with Kerio Operator's intuitive web-based interface

- ✓ **Protect** your phone system from hacking, malicious attacks and abuse by users with advanced security features

- ✓ **Lower** operating expenses significantly through reduced management overhead

- ✓ **Rapid**, simple deployment in any IT environment through hardware, software and virtual options

- ✓ **Enterprise-class** functionality including auto attendant, call queues conference calling, call forwarding, parking, pickup, recording and more
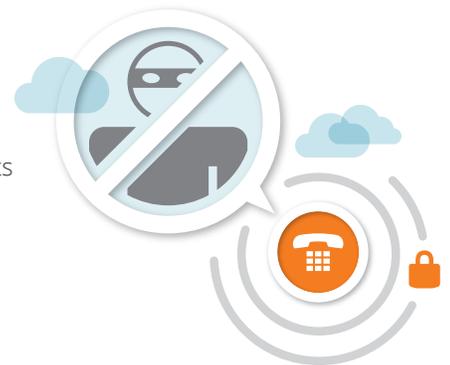

Set Up and Manage Your Phone System Quickly and Easily

- Configure Kerio Operator from your desktop—or a tablet—with the simple and intuitive web-based management console.

- Remotely monitor the Kerio Operator server with SNMP to retrieve detailed utilization and performance statistics.

- Automatically configure a wide variety of phone brands and models on the network with auto-provisioning and DHCP services

- Schedule automatic server backups of configuration files, system and call history logs, voicemail and recorded call data and provisioning files to an FTP server or Samepage, Kerio's cloud-based collaboration solution.
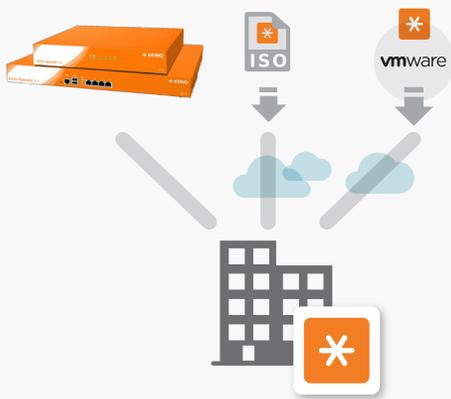

Protect Your Phone System with Uncompromising Security

- Repel phone system hackers, prevent misuse and ensure the privacy of your users with advanced security technologies such as call encryption.

- Protect against password guessing, detect anomalous behavior and prevent break-in attempts through continuous monitoring.

- Ensure that system services are restricted to trusted devices inside the network through a built-in firewall.

Enjoy Substantially Reduced Operating Costs

- Administer your phone system easily without requiring specialized—and often expensive—phone technicians.

- Reduce management overhead dramatically with the Kerio Operator interface and rapid system setup.

- Lower your monthly expenses by leveraging the inherent low cost of VoIP and IP-based telephony.

Deploy Rapidly in Any IT Environment

- Avoid the headaches caused by conflicting applications and vulnerable system services by deploying the Kerio Operator software appliance – a bare metal installation on the hardware of your choice.

- Integrate the Kerio Operator virtual appliance, pre-configured with Kerio Operator software and a hardened OS, into your VMware environment and share the same hardware as other applications.

- Leverage Kerio Operator's product features with the Kerio Operator Box, a stable, solid-state appliance that is pre-configured with Kerio Operator software and a hardened OS.

Streamline Your End Users' Work Lives

- Allow users to make and receive office calls on their Apple iOS or Android mobile devices using the Kerio Operator Softphone mobile app or any other SIP-based VoIP device.

- Enable users to make calls from within Salesforce.com and to connect to desktop dialers like OutCALL with minimal configuration.

- Provide in-demand features including automatic voice-to-email, call forwarding, pickup and parking, conference calling, paging, fax support and more.
