SUPPORT

Easymount laminators are designed to perform and built to last.

Their advanced features allow you to laminate, mount and encapsulate too.

Designed in-house by Vivid, the Easymount range gives your business extra capacity by allowing you to offer your customers a complete service that you previously had to outsource.

▲ EM-1600SH - with swing-out arm for loading vinyl

Easymount gives you the flexibility and versatility

Cost effectiveness

The versatility of Easymount laminators makes them incredibly cost-effective, meaning you can now truly offer a one-stop shop for print and finishing.

The range includes everything from entry-level models for those still finishing jobs by hand, to professional heavy-duty models that will cope with every application all day, everyday.

Lamination in depth, control in abundance

The range of Easymount laminators covers every job you need.

As they're designed in-house by our experts, we can make sure that everything about them is aimed at helping you to do that job more efficiently, more cost-effectively and more reliably.

The Easymount EM-1600SH and EM-A1600SH now feature swing-out arm technology at both the front and rear of the system.

The arms makes loading both vinyl and media a whole lot easier and less time-consuming, with no compromise on the finish.

▲ EM-1600SH Rear View - with swing-out arm for loading laminate

◀ Get stuck in

You can apply more than just laminates – the Easymount range allows you to also lay down application tapes and vinyls, removing the need for squeegeeing by hand.

The feed table also lifts up, making it easier to load rolls of material, increasing effectiveness and minimising hassle.

▶ Fingertip control

Our exclusive patented multilingual control panel is simple and very easy-to-use.

It's available in English, French, German, Spanish and Italian.

Anyone can use it with the minimum of training, and it allows you to take complete control.

Whatever you need, you can achieve with absolute accuracy, quickly and easily.

ility you need.

◀ Easymount by name, Easymount by nature

The patented technology within the Easymount Air uses one of the most advanced concepts ever seen in a wide format laminator.

Pneumatic air pressure controls the laminating rollers, allowing you to mount and laminate with incredible accuracy and speed.

This new technology allows the roller to adjust to the exact thickness and pressure required, giving faster production times.

The pneumatic air allows the roller to float down; ensuring Foamex and fluted boards aren't crushed. When the rollers achieve the correct board thickness, the roller can be locked in place to keep the required gap, making board feeding more accurate.

▶ Covering every angle

When you are preparing a longer run, the optional take-up unit enables you to work with reel-to-reel lamination, saving time and making it more efficient, too.

“ My Easymount has transformed my business. I can finish the job when I'm ready, without having to call on a specialist finisher. ”

- large diameter rollers
- solid heavy duty construction
- magic eye safety feature

Catering for every taste ▶

The Easymount range allows you to laminate a whole range of jobs you previously had to outsource.

So you can laminate shop signs, exhibition stands, roll-up banners and vehicle wraps – you can even mount on Foamex board up to 30mm/1-inch thickness – in-house with ease.

lity you need to get the job completed.

EASYMOUNT AIR -
Award-Winning Wide Format Laminator in the U.S.

The patented technology within the Easymount Air uses one of the most advanced concepts ever seen in a wide format laminator.

Pneumatic air pressure controls the laminating rollers, allowing you to mount and laminate with incredible accuracy and speed.

The roller adjusts to the exact thickness and pressure required, giving faster production times. The pneumatic air allows the roller to float down; ensuring foam and soft fluted boards are not crushed. When the rollers achieve the correct board thickness, they can be locked in place to keep the required gap, making board feeding simple & quick.

Ideal for Sign makers and Print finishers for laminating posters, graphics and signs, mounting prints to boards and applying vinyls, tapes and adhesive films.
