SureColor SC-P7500

The SureColor SC-P7500 (24-inch) is Epson's first 12-colour large-format printer and offers Epson's widest ever colour gamut with 99% Pantone coverage[1]

The SureColor SC-P7500 (24-inch) has been developed for photographers and artists, as it offers reliable reproduction for professional proofing and a rapid throughput for high-volume production. This large-format printer is further complemented by Epson's UltraChrome Pro12 inkset, with K3 technology, which outputs both black inks simultaneously, and includes orange, green and violet, giving the user impressive colour accuracy. Everything is designed to work in harmony as Epson offers the complete solution – printer, inks, substrates, software and support.

Creative freedom, consistent results
Professional photographers and fine art production who demand the highest print quality to make their art more marketable to the discerning buyer. In addition to the 12-colour inkset, the Epson designed, advanced printheads use up to 800 nozzles for each colour, to produce accurate dot placement. They combine high-speed production with quality, thanks to the µTFP12 printhead with 300dpi resolution and 12 channels. Images also benefit from smooth gradations and accurate texture reproduction.

Because precision matters
For packaging and contract proofers for whom precision matters, Epson has raised the industry standard for proofing. With colour measurement, checking and correction technologies, users can work with more efficiency and greater confidence. An optional SpectroProofer with photospectrometer leads to faster and more accurate colour measurement and the in-line proofing colour control is fully automated. In short, results are unerringly predictable.

To keep you up and running
A number of intelligent features improve productivity with minimal maintenance. Epson's unique Nozzle Verification Technology (NVT) and dust prevention means no misprints, even for occasional users, and the PrecisionCore technology ensures there's no loss of quality or detail. The printer's internal ink buffer and sub-tank enables you to change ink cartridges as soon as the current print job finishes, and black ink switching is now redundant thanks to the 12-channel printhead. User self-maintenance is also easy, with manual head and cap cleaning and borderless pad replacement.
